The Department of Clinical Studies offers graduate programs leading to MSc and DVSc degrees.

**Administrative Staff**

**Chair**
Carolyn Kerr (2141 OVC, Ext. 54051)
ckerr@uoguelph.ca

**Graduate Program Coordinator**
Adronie Verbrugghe (2148 Clinical Studies, Ext. 54034)
averbrug@uoguelph.ca

**Administrative Assistant to the Chair and Faculty**
Vanessa Joy (2142 Clinical Studies, Ext. 54069)
vjoy@uoguelph.ca

**Graduate Program Assistant**
TBD (2509 Stewart Building, Ext. 54780)
csgrad@uoguelph.ca

**Graduate Faculty**

*This list may include Regular Graduate Faculty, Associated Graduate Faculty and/or Graduate Faculty from other universities.*

Sarah Abood  
B.Sc., DVM Michigan, PhD Ohio - Assistant Professor  
Associated Graduate Faculty

Anthony C. G. Abrams-Ogg  
BA Alberta, DVM Saskatchewan, D.V.Sc. Guelph, Dipl. ACVIM - Professor  
Graduate Faculty

Ryan Appleby  
B.Sc. Western Ontario, DVM Guelph - Assistant Professor  
Graduate Faculty

Luis Arroyo  
DVM Nacional, D.V.Sc., PhD Guelph - Associate Professor  
Graduate Faculty

Hughes Beaufre  
DVM Lyon, PhD Louisiana - Assistant Professor  
Graduate Faculty

Alexa Bersenas  
B.Sc., DVM, M.Sc. Guelph, Dipl. ACVECC - Associate Professor  
Graduate Faculty

Shauna Blois  
B.Sc., Mount Allison, DVM Prince Edward Island, D.V.Sc. Guelph, Dipl. ACVIM - Associate Professor  
Graduate Faculty

Brigitte Brisson  
DMV Montreal, D.V.Sc. Guelph, Dipl. ACVS - Professor  
Graduate Faculty

Nathalie Cote  
DVM Montreal, D.V.Sc., Guelph - Assistant Professor

Nicola Cribb  
VetMB, MA Cambridge, D.V.Sc. Guelph, Dipl. ACVS - Assistant Professor  
Associated Graduate Faculty

Alice Defarges  
DVM Alfort, M.Sc. Montreal, Dipl. ACVIM - Assistant Professor  
Graduate Faculty

Pauline Delnatte  
DVM Toulouse, D.V.Sc. Guelph, Dipl. ACZM - Clinical Veterinarian, Toronto Zoo  
Associated Graduate Faculty

Christopher J. Dutton  
B.Sc., B.V.Sc., M.Sc. UK, Dipl. ACZM, Dipl. ECZM - Head of Veterinary Services, Toronto Zoo  
Associated Graduate Faculty

Sonja Fonfara  
DVM Hanover, Dr med vet Justus-Liebig (Germany), PhD Helsinki, CertVC, Dipl. ECVIM - Associate Professor  
Graduate Faculty

Luis Gaitero  
DVM Barcelona, Diplomate ECVN - Associate Professor  
Graduate Faculty

Sarah Gardhouse  
BSc, DVM Guelph - Clinical Specialist, Heath Sevices  
Associated Graduate Faculty

Thomas Gibson  
B.Sc. Guelph, B.Ed. Windsor, DVM, D.V.Sc. Guelph, Dipl. ACVS, Dipl. ACVSMR - Veterinarian, Grand River Surgical Services  
Associated Graduate Faculty

Diego Gomez  
DVM, M.Sc. Colombia, MVSc Atlantic Veterinary, PhD Guelph, Dipl. ACVIM (LA) - Assistant Professor  
Graduate Faculty

Joanne Hewson  
DVM, PhD Guelph, Dipl. ACVIM (LA) - Associate Professor  
Graduate Faculty

Fiona James  
HB.Sc. Toronto, M.Sc. Western, DVM, D.V.Sc. Guelph, Dipl. ACVIM -  
Assistant Professor  
Graduate Faculty

Monica Jensen  
B.Sc., DVM, D.V.Sc. Guelph, Dipl. ACVR - Assistant Professor  
Graduate Faculty

Carolyn L. Kerr  
DVM, D.V.Sc. Guelph, PhD Western, Dipl. ACVAA - Professor  
Graduate Faculty

Judith Koenig  
DVM, M.Sc. Vet. Medicine (Austria), D.V.Sc. Guelph, Dipl. ACVS/ECVS -  
Associate Professor  
Graduate Faculty

Cedric Larouche  
DVM Montreal, D.V.Sc. Guelph - Staff Veterinarian, Toronto Zoo  
Associated Graduate Faculty

Noel Moens  
DVM Liege (Belgium), M.Sc. Saskatchewan, Dipl. ACVS/ECVS - Associate Professor
Admission Requirements

Candidates must have either an honours baccalaureate degree or a DVM degree; licensure to practice veterinary medicine in Ontario is not required.

Candidates are accepted based on adequate background preparation and availability of an advisor in the area of interest. Applicants should contact potential faculty advisors with established research programs listed in the department website (http://ovc.uoguelph.ca/clinical-studies/).

Acceptance into the MSc thesis program will be dependent on stipend funding opportunities that may be available through faculty advisors, scholarships or sponsorship. There is usually no stipend support for MSc course work students.

Program Requirements

Students enrol in one of two study options:

1. thesis, or
2. course work and major research paper.

Thesis
The thesis option requires a minimum of 6 semesters (2 years) of full time study. The program provides focused research training in areas related to veterinary medicine. Research projects may examine aspects of clinical practice or concepts but are not considered discipline or specialty training.

The program involves a minimum of three 0.50 credit graduate level courses. Candidates are required to carry out an independent research study and produce a thesis. The course selection will be made by the student in consultation with the advisory committee and tailored to the student’s particular research interest, and will be approved by the departmental Graduate Studies and Research Committee.

Course Work and Major Research Project (MRP)

The course work option requires a minimum of 3 semesters (1 year) of full time study. The program provides course work and focused research training in areas related to veterinary medicine. Research projects may examine aspects of clinical practice but are not considered discipline or specialty training.

The program involves a minimum of three 0.50 credit graduate level courses. Candidates are required to carry out an independent research study and produce a thesis. The course selection will be made by the student in consultation with the advisory committee and tailored to the student’s particular research interest, and will be approved by the departmental Graduate Studies and Research Committee.

There are no required courses beyond the 1.0 credit project course. The remaining courses will be chosen from courses within the Department
of Clinical Studies and other courses provided across the University. The course selection will be made by the student in consultation with the advisory committee and tailored to the student’s particular research interest, and will be approved by the departmental Graduate Studies and Research Committee.

**DVSc Program**

The DVSc degree is offered in large animal surgery, small animal surgery, large animal medicine, small animal medicine, anesthesiology, cardiology, neurology, ophthalmology, radiology, emergency and critical care, companion animal nutrition and avian and exotics medicine depending upon availability. The program provides advanced academic preparation in both clinical training and research and is a unique post-professional doctoral-level degree. The DVSc differs from PhD training by emphasizing the development of both clinical research and applied skills in the various areas of clinical specialization appropriate for preparation for specialty Board certification.

Doctor of Veterinary Science positions are usually funded positions, and are usually advertised and selected through the American Association of Veterinary Clinicians’ website at www.virmp.org (http://www.virmp.org) which can be accessed in early October. The start date is early August. Occasionally specialty training positions become available and are advertised on our website and through appropriate veterinary channels.

The DVSc is currently an interdepartmental program and receives input from all academic departments in the Ontario Veterinary College (OVC):

- Biomedical Sciences,
- Clinical Studies,
- Pathobiology and
- Population Medicine.

**Admission Requirements**

Minimum of Ontario Equivalent average of 'B' (73% minimum) or GPA 3.0/4.0 in a doctor veterinary medicine (DVM) program or equivalent which would allow the applicant to be eligible for licensure to practice veterinary medicine in Ontario. In addition a completed internship or equivalent is usually required.

**Program Requirements**

This program involves two-thirds of the time in applied clinical practice, and one-third of the time taking a minimum of five 0.5-credit graduate courses, conducting a research project related to the veterinary specialty, a written and oral qualifying exam to be taken before the end of the 6th semester, writing a thesis in a publication ready format, and a thesis defense in front of an examination committee. Candidates are required to develop investigative skills in their chosen area of specialization by carrying out an original study, generally related to animal health. The results of the research must make a significant contribution to the candidate’s area of specialization and be written up as a thesis. Five graduate level courses are required.

**Collaborative Specializations**

Faculty in Clinical Studies also participate in the collaborative specializations in Neuroscience (calendar.uoguelph.ca/graduate-calendar/collaborative-specializations/neuroscience/) and Regenerative Medicine (calendar.uoguelph.ca/graduate-calendar/graduate-programs/cclinical-studies/graduate-calendar/collaborative-specializations/regenerative-medicine/).

**Courses**

**CLIN*6010 Clinical Medicine F Fall Only [0.50]**

These are in-service clinical training courses based on case material presented to the student in the Veterinary Teaching Hospital. Under supervision, the student is expected to take primary responsibility for case management including decisions related to diagnosis, therapy and client/referring veterinarian communications. Case material studied in each course reflects a different clinical subspecialty commonly occurring in the Fall (F), Winter (W), and Summer (S) semesters respectively. **Department(s): Department of Clinical Studies**

**Location(s): Guelph**

**CLIN*6030 Clinical Medicine W Winter Only [0.50]**

These are in-service clinical training courses based on case material presented to the student in the Veterinary Teaching Hospital. Under supervision, the student is expected to take primary responsibility for case management including decisions related to diagnosis, therapy and client/referring veterinarian communications. Case material studied in each course reflects a different clinical subspecialty commonly occurring in the Fall (F), Winter (W), and Summer (S) semesters respectively. **Department(s): Department of Clinical Studies**

**Location(s): Guelph**

**CLIN*6031 Clinical Medicine S Summer Only [0.50]**

These are in-service clinical training courses based on case material presented to the student in the Veterinary Teaching Hospital. Under supervision, the student is expected to take primary responsibility for case management including decisions related to diagnosis, therapy and client/referring veterinarian communications. Case material studied in each course reflects a different clinical subspecialty commonly occurring in the Fall (F), Winter (W), and Summer (S) semesters respectively. **Department(s): Department of Clinical Studies**

**Location(s): Guelph**

**CLIN*6170 Clinical Surgery F Fall Only [0.50]**

These are in-service clinical training courses based on case material presented to the student in the Veterinary Teaching Hospital. Under supervision, the student is expected to take primary responsibility for case management including decisions related to diagnosis, therapy and client/referring veterinarian communications. Case material studied in each course reflects a different clinical subspecialty occurring in Fall (F), Winter (W), and Summer (S) semesters respectively. The student is required to prepare a paper for publication in a recognized peer review journal based on clinical case material presented to the teaching hospital. As an alternative, the paper can be an in-depth review article on a clinically relevant topic. **Department(s): Department of Clinical Studies**

**Location(s): Guelph**

**CLIN*6180 Clinical Surgery W Winter Only [0.50]**

These are in-service clinical training courses based on case material presented to the student in the Veterinary Teaching Hospital. Under supervision, the student is expected to take primary responsibility for case management including decisions related to diagnosis, therapy and client/referring veterinarian communications. Case material studied in each course reflects a different clinical subspecialty occurring in Fall (F), Winter (W), and Summer (S) semesters respectively. The student is required to prepare a paper for publication in a recognized peer review journal based on clinical case material presented to the teaching hospital. As an alternative, the paper can be an in-depth review article on a clinically relevant topic. **Department(s): Department of Clinical Studies**

**Location(s): Guelph**
CLIN*6181 Clinical Surgery S Summer Only [0.50]
These are in-service clinical training courses based on case material presented to the student in the Veterinary Teaching Hospital. Under supervision, the student is expected to take primary responsibility for case management including decisions related to diagnosis, therapy and client/referring veterinarian communications. Case material studied in each course reflects a different clinical subspecialty occurring in Fall (F), Winter (W), and Summer (S) semesters respectively. The student is required to prepare a paper for publication in a recognized peer review journal based on clinical case material presented to the teaching hospital. As an alternative, the paper can be an in-depth review article on a clinically relevant topic.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6190 Neurology Fall Only [0.50]
Basic principles of lesion localization in the domestic species with discussions of diagnostic problems in veterinary neurology. Offered alternate years.
Restriction(s): Instructor consent required.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6200 Concepts and Application of Infection Control Unspecified [0.50]
This course will involve principles of infection control in veterinary hospitals, drawing heavily from information from human medicine and evaluating human information in a veterinary context.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6270 Applied Surgical Principles Unspecified [0.25]
General surgical principles associated with surgical and related treatment of various body systems. This is an applied course with laboratory and written components. Prerequisite: must have prior surgical training.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6310 Advanced Equine Veterinary Orthopaedics Orthopaedics Unspecified [0.50]
This course will provide the student with an in-depth understanding of orthopedic practice and will facilitate revision of materials to prepare board certification.
Restriction(s): Instructor consent required.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6330 Advanced Principles of Diagnostic Imaging Unspecified [0.50]
This course is intended for students pursuing a career in veterinary radiology. Using a lecture-discussion format, the science of x-ray production and the fundamentals of other diagnostic imaging modalities will be presented. The specific applications of these techniques to research and clinical situations will be investigated.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6350 Advanced Radiology I Summer, Fall, and Winter [0.50]
Radiographic changes seen in diseases of the thorax and abdomen are demonstrated by using radiographs. Contrast and special studies are included where applicable.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6370 Advanced Radiology II Fall Only [0.50]
A continuation of CLIN*6350, covering radiographic abnormalities of the neurological and skeletal systems.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6380 Electrocardiography in Domestic Animals Summer, Fall, and Winter [0.50]
This course will deal with the study of the electrocardiography of the cat, dog, cow and horse. Students will review the mechanisms of arrhythmogenensis and the role of anti-arrhythmic agents in the control of arrhythmogenensis.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6420 Anesthesiology I Summer Only [0.50]
A course in advanced veterinary anesthesia and allied topics such as fluid, acid-base, and electrolyte balance, shock therapy, and cardio pulmonary resuscitation.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6440 Anesthesiology II Summer, Fall, and Winter [0.50]
A discussion, reading and investigative course on research methods in comparative anesthesiology.
Prerequisite(s): CLIN*6420
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6460 Anesthesiology III: Species Specific and Coexisting Disease Considerations Fall and Winter Reg Required [0.50]
A course in advanced veterinary anesthesia that focuses on the scientific literature related to the anesthesia of specific species and veterinary patients with varying underlying diseases.
Prerequisite(s): CLIN*6420 and CLIN*6440
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6550 Small Animal Internal Medicine I Unspecified [0.50]
This is a graduate course designed for DVSc students and residents pursuing further study in the area. The basis of the course is the acquisition and application of knowledge of the pathophysiologic mechanisms of disease. The subject area(s) will be one or two organ systems, which will not be repeated in either CLIN*6550 or CLIN*6560 over a 3-year period.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6560 Small Animal Internal Medicine II Unspecified [0.50]
This is a graduate course designed for DVSc students and residents pursuing further study in the area. The basis of the course is the acquisition and application of knowledge of the pathophysiologic mechanisms of disease. The subject area(s) will be one or two organ systems, which will not be repeated in either CLIN*6550 or CLIN*6560 over a 3-year period.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6570 Large Animal Internal Medicine I Winter Only [0.50]
Advanced study in general medicine and pathophysiologic principles of disorders of the gastrointestinal and urinary systems in ruminants, swine and horses. Offered every third year.
Department(s): Department of Clinical Studies
Location(s): Guelph
CLIN*6580  Large Animal Internal Medicine II  Winter Only  [0.50]
Advanced study in general medicine and the pathophysiologic principles
of disorders of the cardiovascular, respiratory and musculo-skeletal
systems of ruminants and horses. Offered every third year.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6590  Large Animal Internal Medicine III  Winter Only  [0.50]
Advanced study in general medicine and the pathophysiologic principles
of neonatal disorders and disorders of the nervous system, skin and
general systemic disorders. Offered every third year.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6600  Equine Soft Tissue Surgery I  Summer, Fall, and
Winter  [0.50]
Based on required reference reading, every other week discussion will
cover advanced soft tissue procedures performed in equine surgery.
Guest lectures on selected topics will be presented. Laboratory will be
given.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6610  Equine Soft Tissue Surgery II  Summer, Fall, and
Winter  [0.50]
Based on required reference reading, every other week discussion will
cover advanced soft tissue procedures performed in equine surgery.
Guest lectures on selected topics will be presented. Laboratory will be
given.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6620  Ruminant Surgery  Winter Only  [0.50]
Through lectures/seminars, medical and surgical laboratories, and
detailed case discussions, this course provides practical experience in
ruminant medical, radiological and surgical procedures and in problem-
solving related to ruminant practice.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6661  Respiratory Physiology &
Pathophysiology  Unspecified  [0.50]
This is a graduate course designed for veterinarians pursuing advanced
training in residency and DVSc programs. The course will cover normal
respiratory anatomy, physiology and pulmonary function. A focus on
respiratory pathophysiology will include respiratory failure, oxygen
therapy and positive pressure ventilation. (offered every three years).
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6670  Structure and Function of Animal Skin  Summer, Fall, and
Winter  [0.50]
A review of structure and function of skin in veterinary dermatology
including the epidermis, dermis, subcutis and adnexal tissue. Application
of knowledge in a clinical setting will follow with attention to modalities
that will improve the epidermal barrier
Restriction(s): Instructor consent required.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6680  Readings in Cardiology I  Summer, Fall, and Winter  [0.50]
Original articles, review articles and textbook chapters dealing with the
most recent concepts of pathophysiology, diagnostic procedures and
therapeutic advancements will be reviewed, analyzed and discussed.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6690  Readings in Cardiology II  Summer, Fall, and Winter  [0.50]
Readings in Cardiology II will be a continuation of the format of Readings
in Cardiology I with further readings in clinical cardiology.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6700  Pathophysiology in Small Animal Surgery I  Summer, Fall,
and Winter  [0.50]
Based on required reference reading, weekly discussions will cover
the disease mechanisms involved in medical problems commonly
encountered in small animal surgical practice. Guest lectures on selected
topics will be presented.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6710  Pathophysiology in Small Animal Surgery II  Summer, Fall,
and Winter  [0.50]
Based on required reference reading, weekly discussions will cover
the disease mechanisms involved in medical problems commonly
encountered in small animal surgical practice. Guest lectures on selected
topics will be presented.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6800  Surgical Oncology Procedures  Fall and Winter  [0.50]
This is a combined reading and laboratory course that will cover the
major surgical oncology procedures. The relevant readings will be
covered, followed by a cadaver laboratory to teach the students the
important features of each procedure.
Offering(s): Offered alternate years
Restriction(s): Instructor consent required.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6910  Professional Veterinary Communication Competencies  Fall
and Winter Reg Required  [0.50]
This course assists learners in developing professional competencies in
several critical areas of professional veterinary practice: 1) the veterinary-
patient-client relationship; 2) the preparation and delivery of professional
seminars; and 3) clinical teaching in small groups.
Restriction(s): Students in Clinical Studies
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6950  Special Topics in Clinical Studies  Summer, Fall, and
Winter  [0.50]
Restriction(s): Restricted to Clinical Studies students.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6960  Special Topics in Zoological Medicine  Fall and
Winter  [0.50]
Preparation for the ACZM examination and based on the published ACZM
examination reading list. Students will prepare reading assignments that
will be discussed during scheduled time. Each semester will focus on a
specific taxon group. A mock examination will be provided on an ACZM
sub-specialty (typically birds, reptiles, wildlife, terrestrial mammals or
aquatic medicine).
Restriction(s): Instructor consent required.
Department(s): Department of Clinical Studies
Location(s): Guelph
CLIN*6970 Neurology II Unspecified [0.50]
Advanced study in neurolocalization with a focus on functional neuroanatomy and diagnostic procedures in the domestic species. This two-semester course is offered every 2-3 years.
Restriction(s): Instructor consent required.
Department(s): Department of Clinical Studies
Location(s): Guelph

CLIN*6990 Project in Clinical Studies Summer, Fall, and Winter [1.00]
This course involves participation in a clinical research project or clinical retrospective study. A review of the relevant literature will be performed. A manuscript suitable for publication in a peer-reviewed journal will be prepared, and the study will be presented in a departmental seminar.
Restriction(s): Restricted to students in the MSc by coursework program.
Department(s): Department of Clinical Studies
Location(s): Guelph
